

E-Glass Assembled Roving for Pultrusion

Details

E-Glass Assembled Roving for Pultrusion

E-Glass Assembled Roving for Pultrusion is suitable for polyester, Vinylester and Epoxy etc .

It's compatible with many kinds of resins .

It is used in the FRP extrusion moulding and many kinds of FRP materials such as tabernacles, gratings, poles and cable slot .

Product Characteristics

1. Uniform tension , good gathering , little catenary
2. No fuzz , even linear density
3. Fast and complete wet-out in resins
4. Outstanding mechanical properties

Product Parameter

Production Code	Filament diameter (um)	线密度 (Tex)	Moisture (%)	LOI (%)	Breaking strength (mm)	Roll Weight (Kg)
EW210H	13	1200、2400、4800、9600	≤0.10	0.55±0.15	≥0.35	20±0.5
EW256H	13	1200、2400、4800、9600	≤0.10	0.55±0.15	≥0.35	20±0.5
