

E Glass Spray up Roving

Model:E Glass Spray up Roving

E Glass Spray up Roving

Details

E Glass Spray up Roving

E Glass Spray up Roving is mainly compatible with reinforced unsaturated Polyester, Vinylester resin and so on.

E Glass Assembled Roving for Spray Up is mostly used to produce FRP boat hulls, safe board, sanitary apparatus and swimming pools etc.

Product Characteristics

- 1.Good stiffness and excellent choppability
- 2.Good dispersion and low static
- 3.Excellent lay down property
- 4.Fast and complete wet-out in resins good moulding performance
- 5.Silane coupling agent

Product Parameters

Product Code	Filament Diameter	Linear Density	Moisture Content	LOI(%)	Roll Weight
EW410	12	2400	≤0.10	1.10±0.15	17±0.5
