

## Finished Glass Fabrics for Printed Boards

### Finished Glass Fabrics for Printed Boards

#### Details

#### Finished Glass Fabrics for Printed Boards

The fabrics are manufactured with Nittobo advanced technologies and modern equipment .They are especially designed for printed boards. It has excellent properties of electrical insulation and processing. They are the necessary basic materials for electronic industry such as computers and communication equipments.

#### Product Characteristics

1. Even fabric thickness
2. Excellent wet out with resin
3. Excellent electrical insulation
4. very few appearance defects
5. Excellent Processability

#### Product Specification

Product Code	Thickness (mm)	Width (mm)	Weight (g/m <sup>2</sup> )	Diameter roll/cm		Strength(Newton /25×100mm)		Roll Length (m)
				Warp	Filling	Warp	Filling
